

# *Platanus occidentalis*

## Sycamore

This fast growing tree is most striking in the winter and early spring, when it's unusual bark contrasts against the blue sky. The reddish-brown bark of the sycamore scales off on the upper trunk and branches, revealing a creamy layer beneath. Leaves are large. Choose the site with care, it tends to drop a lot of twigs and leaves.

***Suggested Companions:*** willows (*Salix* sp.), river birch (*Betula nigra*), silver maple (*Acer saccharinum*), swamp white oak (*Quercus bicolor*)
